

EnviroLink™
SMARTER COLLECTION

EnviroLink™ Multiplex

SMARTER COLLECTION AT YOUR FINGERTIPS

The EnviroLink™ Multiplex is a next-generation control and monitoring system that maximizes waste collection efficiency, enhances safety, and simplifies diagnostics.

Built with an intelligent multiplexed architecture, it seamlessly integrates real-time monitoring, automated safety interlocks, and remote diagnostics, keeping your fleet running at peak performance.

Operators benefit from an intuitive, extra-large touchscreen, while modular wiring reduces downtime and lowers maintenance costs.

With smarter automation, seamless connectivity, and enhanced operator control, EnviroLink™ turns complex waste collection into a smooth, precision-driven operation—keeping your fleet ahead of the competition.

Smart safety interlocks

High-definition cameras with shutters and heaters

High-definition cameras with shutters and heaters

Auto-packing functionality

Auto-dump arm programming

Remote troubleshooting

Selectable packer options

New modular harness architecture

Advanced system architecture

User-friendly Interface

ENVIROLINK™ HAS LAID THE FOUNDATIONS FOR A BRAND-NEW ERA IN TRUCK INTELLIGENCE.

An improved multiplex network and analog system, cameras and monitors, scales, diagnostic tools, safety interlocks, alerts, GPS tracking, and more are now packaged in a more precise, reliable, and efficient Smart Collection Package.

LARGE TOUCHSCREEN DISPLAY

The 80% larger WVGA screen provides clear visibility, enabling operators to easily navigate controls, monitor truck functions, and improve efficiency during waste collection operations.

QUICK ACCESS TOOLBAR

Operators can instantly access Cart Counters, Warnings, and System Status, streamlining data visibility and allowing for quick adjustments in the field.

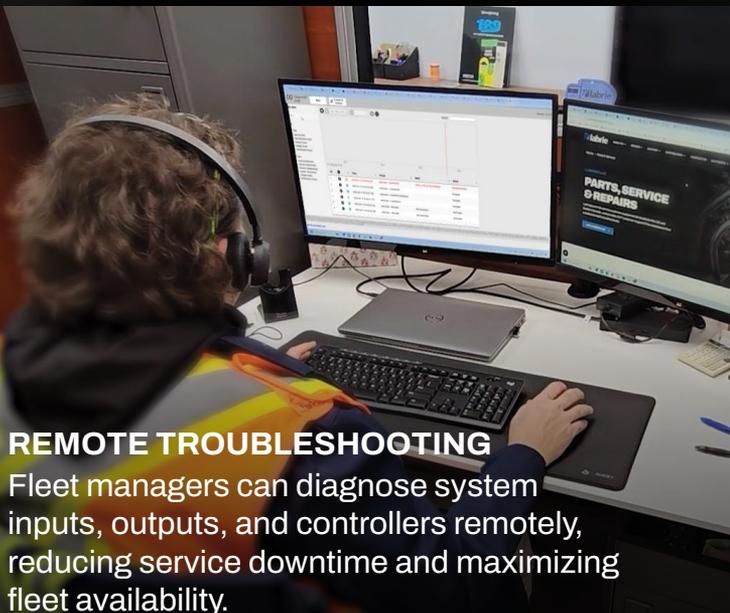

SAFETY INTERLOCKS

Built-in collision detection and automated safety locks prevent unauthorized or unsafe operations, enhancing both worker and equipment protection.

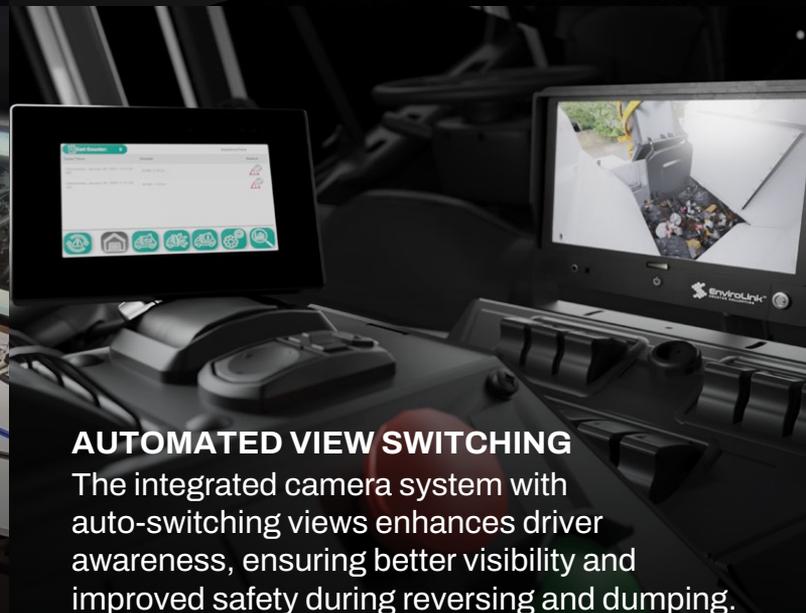

MODULAR HARNESS SYSTEM

A streamlined wiring architecture reduces maintenance complexity, minimizes parts inventory, and ensures faster serviceability for increased uptime.

REMOTE TROUBLESHOOTING

Fleet managers can diagnose system inputs, outputs, and controllers remotely, reducing service downtime and maximizing fleet availability.

AUTOMATED VIEW SWITCHING

The integrated camera system with auto-switching views enhances driver awareness, ensuring better visibility and improved safety during reversing and dumping.
